J. C. KAVANAGH, Postmaster.

The Brandon Daily Mail.

FRIDAY, JANUARY 2, 1903.

The Sun is again to the fore with a prophecy. This time it is said that before four years a great deal will be heard about what the C. P. R. has not done for Brandon. Well, so far the Sun as a false prophet would put to shame even Mohammed, and its predictions are as apt to be verified as those of Moses Oates. Before four years are over Brandon will be four times its present size, and as prosperous as it is at present, the puny efforts of the Sun to hurt its credit to the contrary notwithstanding.

No further returns of much importance have been received since our issue of yesterday and the showing now is 19 Conservatives to 9 Opposition. It will be several days, perhaps, before the full returns will be in hand. It appears that in Manitoba the contest was close, and so far the result is unknown. Our despatch claims a majority for Murphy while another gives it to Greenway. We would not be the least surprised if it should come out that the beautiful Greenway had gone to the wall. It would be a fitting rebuke for his determined effort to stir up strife and discontent.

The Chicago Evening Journal notes that there is every indication that the people of the South are repudiating the free trade heresies of the Bourbon Democracy. This is one of the natural results of abolishing slavery and making manual labor more respectable. It is also one of the good results of a diversified industry. Protection helps the workman; free trade is the theory of the drone who produces nothing, but buys everything, and of course he wants to buy where he can buy the cheapest. Protection is to commerce what the circulation of the blood is to the body.

The organ of discontent sheds very bitter and scolding tears over the defeat of Messrs. Sifton and Glass, bemoans the lack of appreciation on the part of the electors of two such prodigies of mind and matter, and the dual representation of all that is clever and experienced. We opine that Messrs. Woodworth and Harrison are qualified to represent the large and influential divisions of Brandon and Minnedosa to the satisfaction of the electors. Of course the Sun is a chronic growler, and we are prepared to hear its lamentations and aloud comments for some time to come. But would it not be well for it to nurse its wrath for a time, and refrain from such silly nonsense as it now indulges in.

The Chief of Police, in Winnipeg, recommends closer scrutiny in matters connected with hotels. As matters now stand any one who can provide sleeping accommodation are granted a license, no matter what their previous calling or character may have been or what the house, for which the license is taken out, may be like. Through this system the city has numerous licensed dives, which are really the hot-beds of vice and drunkenness, and which serve to harbor lawless and disreputable characters, who are the pests of society. Perhaps in no city of its size in Canada are there so many persons who are mere hangers on, and who live by their wits as are to be found in Winnipeg, and if the law, and disreputable places were removed, the number would be greatly reduced, and the criminal records of the city would show a marked decrease.

The report that the Prince of Wales will visit Canada during the coming summer is now denied, but it is stated that he may visit Montreal next year. Should he do so His Royal Highness will be much surprised at the great changes which have taken place in the Dominion since his previous visit. Instead of everything remaining almost unchanged for ages, as he is accustomed to witness in the mother country, he will find a fair country which is daily advancing, and that with such rapid strides that a pleasing and changing panorama is constantly before the eye. He will find a heritage before him that will surprise him by its extent and rapid development, and should he extend his tour to the Northwest he will find greater cause for astonishment. Before him would be laid a picture of prosperity and advancement of which he had not dreamed. He would gaze upon an almost boundless tract of the finest land under the sun, and a land of such vast

ness that a number of the European countries sink to insignificance when compared with it. A land that will in the near future be the pride and boast of Canadians, and the home of millions of happy, contented and loyal subjects.

From all parts of the Province the very good up that the claim-jumper is at work. Hundreds of men who have taken up land, done some improvements, and were preparing to hold the homestead, find that through some technicality they are robbed of their just rights by some sharper who steps in, and who is often not particular as to the means used to secure his ends. In many cases false declarations are made, and the jumper laughs at his victim. In view of such practices being resorted to settlers should endeavor to give the jumpers as little chance as possible to trouble them. Then they should band themselves together, and form a vigilance committee, and when the disreputable robbers came among them, to be ready for them, by giving them a rather warm reception. Of course we do not for a moment advocate harshness or brute force, but there are hundreds of ways by which the offender could be driven off, and no violence resorted to.

"To quarrel with the deliberate choice of the people of a whole province would be an excess of folly we do not propose to commit." The above is from the evening founding and is to say the least of it very astounding. How a great and mighty force, backed by the giant intellect of its scribbles, can refrain from entering into such a contest is surprising, and how thankful the people of the province should be that the terrible shunder has decided to bury the lachet. Think of the devastation that would be wrought should it enter the lists, plow down its gunnits and its targe, and on the hardy yeomen charge. Of course no quarter would be given, and the valiant sheet would stalk forth over the land, committing worse confusion than the plagues of Egypt. The men who had the hardihood to vote as their conscience dictated would be scattered as the leaves of autumn and the blizzards would shriek and howl and require over their unburied corpses, and still the avenging blade would not be stayed, not the crushing bludgeon laid aside. Think of it, sections of Manitoba, and endeavor to realize what a narrow escape you have had, and do not forget to give thanks to the Dan. Quirk of the Sun for being so considerate, so kind. Would it not be wiser for the gods to see the sheet charging on a whole Province, while all the world wondered, and shouting out its battle cry of *ad hoc* *pro* *tyranny*. Talk of earthquakes, tidal waves and geyser mounds but what are they compared to the wrath of the what-is-it. But why harrow the minds of the people with any more of what might have been.

GENERAL NEWS.

A few days ago the Toronto police were notified that a young girl named Clara Ralph, daughter of parents who reside in Pittsburgh, Pa., and who moves in the highest society, was missing, and as it was thought she had come to Toronto, an officer was detailed to search for her. He found her in a house of ill repute, No. 11 Emily street, and in the conversation that followed, she stated that about three weeks ago she made the acquaintance of a commercial traveller, who told her that his name was simply "Frank." They became so intimate that she deserted her parents within a week, and was in turn described by "Frank" as soon as he brought her to Canada. She also stated that her parents had treated her cruelly, but she appeared to be very anxious to return home. The Pittsburgh authorities have been notified, and the girl will probably be taken back.

Mr. Jones, of Boston, Ont., is the most extensive bee raiser in the world. He has honey farms in Ontario and aparies at Lamoos, Isle of Cypress, and Beirut, Syria, and was the original importer of the famous Cyprian and Holy Land bees.

The London Times says: Canada has perhaps, advanced in material prosperity more than any other colony during the past three years; and in the settlement of its western territory and the development of this territory by railway communication the Dominion has a magnificent future in store.

George Scheller, who had been arrested on suspicion of setting fire to the Newhall House Milwaukee, is an old Detroit boy, born and brought up in that city. He graduated from one of the Detroit schools, and when fourteen years of age attracted the attention of Major Biddell, who took him into his employ on his Gross Isle property, where in a few years he was promoted to its entire management. He was made a clerk in the Biddell House, and when Mr. Antisdel took possession he was head clerk and cashier, in which position the new proprietor retained him and when he removed to Milwaukee took him there in the same capacity. Scheller while here, and during the first part of his career in Milwaukee had good habits, accumulated considerable property, and was universally respected. Within the last few years he has got into a habit of dissipation which cost him his place. He went from bad to worse, losing nearly all his money.

"Whenever I am in doubt as to the exact meaning of a word," remarked the managing editor to a subordinate, "I always consult a dictionary." "I never do," said the sub. "Why, how do you know whether you are right or not?" queried the boss. "Oh, I always refer it to you," chirped his assistant. — *New York Commercial Advertiser.*

Restlessness quickness at repartees was displayed by an actor at the Belleville Theatre, says *Chambers' Journal*, when some one threw the head of a goose on the stage. Advancing to the front the player said: "Gentlemen, if any one among you has lost his head, do not be uneasy, for I will restore it at the conclusion of the performance."

A once advertised that he had for sale the kind of apples that Eve ate, and the next day his house was crowded with women. — *London Standard.*

As long as the up-country people are in the country at Stony Mountain for the new year, it is also expected that walls of suitable workshops will be erected around the building during the coming summer.

Work is progressing rapidly on the new residence of the Lieut. Governor. The structure will cost \$25,000, and will be ready for occupation about the first of July. Work will shortly be begun on the stables and coach house, and the grounds will be nicely laid out next season.

Several gentlemen who have just arrived in the city from the Bygonie settlement say that the settlers there are in a terrible state of excitement over the claim jumping which has been going on of late. They say that a great many unprincipled men have made it their business to jump all the claims in the neighborhood, and there are prospects of a very busy time, the people not feeling inclined to give up their land without a struggle. They have formed a vigilance committee and intend to stick together.

An explosion occurred in Superintendent Egan's private car at the end of the track yesterday. It appears the caretaker allowed the steam in the pipes to freeze, and when he lit the fire the explosion occurred. The explosion was blown up, the pipes burst, and the car was badly shaken. Luckily, however, neither Egan nor the caretaker were in the coach at the time. The car was filled up with stores. Mr. Egan has been injured at the end of the track by a severe accident, which provides him with a new lease of life.

A case of peculiar interest to many of those who were engaged in real estate transactions during the late boom has just been decided. The facts of the case are as follows: On or about the 16th day of Nov. 1881, Mr. John Bonillie, of Portage la Prairie, purchased from Messrs. Boyle & Washington, real estate brokers, also of that town, a lot on Saskatchewan avenue, the property of Mr. J. D. Shore for the price of \$50 per foot cash, and deposited the nominal sum of \$5 to clinch the bargain. Messrs. Boyle & Washington telegraphed news of the sale to the owner, requesting that deeds should be sent. At this time, however, property was rising very rapidly, and the following week Mr. Shore having received an offer better by some \$500 than Mr. Bonillie's, sold the lot and conveyed it to the new purchaser. Mr. Bonillie not liking to be excluded in this off-hand manner, but little time in entering an action for damages, and after pushing his case through all the tedious probabilities of a chancery suit, eventually gained his point. The court held Shore guilty of gross fraud, and charged the plaintiff to be entitled to damages to the extent of the difference between the price at which the lot was first sold, viz., \$5 per foot, and the highest price which it would subsequently have realized. Evidence was produced before the Master in Chancery on Tuesday proving that the lot could at one time, subsequently to sale to Mr. Bonillie, have been sold at from \$180 to \$200 per foot, and accordingly this favorite of fortune will eventually receive from \$2,800 to \$5,000 as the result of his \$5 investment.

Considerable talk has of late been occasioned by the illicit sale of whiskey at the old Police Barracks at Stony Lake, which reached its height on Saturday, Jan. 6th, when information was had by Constable J. W. Forster against Samuel Prosser, an ex-policeman, for selling liquor without license, and while occupying a Government building. Being seized thereof, the defendant pleaded guilty, and was fined by John Templeton, J. P., the sum of \$50 and costs. Two other cases were heard before the same Justice by the same informant against A. H. Scoultin for similar offenses. In each case Scoultin was fined \$20 and costs, and both Prosser and Scoultin were equalized by the magistrate for three years from obtaining license according to the Act. Chief Constable, of the Provincial Police, returned from Rat Portage Wednesday evening from an expedition in connection with the recent small-pox scare. The details of his trip will be embodied in an official report which he will hand in to the Government. He states, however, in a general way that there has been nothing to warrant the excitement and exaggeration which have prevailed in some quarters. There is at present but one case of small-pox at Rat Portage and the patient is getting better. The house is under strict quarantine, and as soon as the patient is sufficiently recovered he will be sent, along with the other four inmates of the place, to the new camp which is being prepared as a hospital. This will henceforth be used for all small-pox cases which may break out in the surrounding district of country. There are at present now sick, but getting well, and a number of others in quarantine, making twenty in all. The camp, which was located on a hill and a half west of the village, has been burned, the inmates being removed to quarantine, as already stated. The Chief took out supplies of vaccine and other necessary things. The hospital camp is provided with a doctor and a nurse and all facilities for promoting the comfort of the sick and exterminating the disease.

PRICES UNDER THE CONFEDERACY.
A friend sends us the following circular, and writes: "Provisions are high now, but they might be worse; for example, note the enclosed."

CONFEDERATE STATES OF AMERICA,
